

## Art of Light by Adela Andea

"Romanian-born artist Adela Andea creates futuristic light installations that range from wall-based works to immersive environments. The pieces appears as lit explosions, with LED lights, magnifying lenses, and flex neon springing outwards in a blend of chaos and control. Despite their composition of electrified material, each work is inspired by a natural phenomena. Andea looks to bioluminescent sea life, melting icebergs, and cosmological events to shape the composition and meaning of her large-scale installations." via Colossal

Andea is currently represented by Anya Tish Gallery in Houston and Cris Worley Fine Arts in Dallas. You can see more of her neon-based installations on her website
